 Currently based in Calgary, AB   batist.design   in/nbatist   github.com/jansoldat

SUMMARY

Experienced front-end engineer (5+ years) specializing in React/TypeScript ecosystems with expertise in performance optimization, modern UI development, and developer tooling. Proven success in enterprise SaaS platforms and startup environments.

SKILLS

Fundamental Skills:	JavaScript, TypeScript, React, Node.js, GraphQL, RESTful APIs, HTML, CSS, SCSS
UI & State:	Context API, RxJS, Zustand, Tailwind CSS, Chakra UI, Styled Components
Data Visualization:	Recharts, Highcharts, Chart.js
Testing:	Jest, Vitest, React Testing Library, Cypress, Playwright
Other Tools:	Turborepo, Vite, Webpack, ESLint, Knip, Husky, Prettier, Storybook, Git, GitHub, Azure DevOps, GitHub Actions, CI/CD, AWS Amplify

EXPERIENCE

Finofo *Sep 2024 - Present*
Frontend Engineer Calgary, AB, Canada

- Led a frontend development team to optimize usability and performance for a financial automation platform.
- Built an Approval Transaction UI Workflow using **React, TypeScript, Zustand, Chakra UI**.
- Set up a Turborepo monorepo, introducing **ESLint, Prettier, Knip and Husky**.
- Integrated **Vitest, Playwright, and React Testing Library** ensuring frontend reliability.
- Designed and maintained **CI/CD pipelines with GitHub Actions**, automating deployments and testing workflows.
- Conducted **technical frontend interviews**, evaluating candidates and refining the hiring process.

Veeam Software *Jun 2023 - Jul 2024*
Frontend Engineer Prague, Czech Republic

- Developed scalable, high-performance UIs for Veeam ONE, a monitoring solution for data protection systems.
- Built configurable React-based interfaces, improving performance and scalability.
- Engineered **RIB-structured** UI components using **React, TypeScript, RxJS, Styled Components, and Highcharts**.
- Applied **test-driven development (TDD)** with **Jest** to maintain code quality.

Dotidot s.r.o. *Dec 2020 - May 2023*
Frontend Engineer Prague, Czech Republic

- Modernized legacy codebase while delivering new marketing automation product.
- Developed a comprehensive **UI component library** using **React** and **TypeScript** for data-intensive platforms.
- Implemented a **Web Worker-based CSV parser** (processing time reduced from **4s to 0.5s**).
- Implemented **Cypress E2E tests** to ensure reliability and prevent regressions.
- Integrated **React Testing Library, ESLint, and GraphQL Code Generator** for improved development workflows.

CSAD SVT Praha *Sep 2017 - Nov 2020*
Technical Support Prague, Czech Republic

- Automated XML processing workflows with Bash scripts.
- Developed a **Playwright-based web scraper**, reducing data extraction time from **2 hours to 4 minutes.**

INVOLVEMENT

React Girls *March 2022 - January 2024*
Mentor

- Mentored aspiring front-end developers, guiding them from project conception to delivery.
- Assisted with tool selection, best practices, and hands-on development support.
- Led successful project completions, with all mentees securing developer roles.

EDUCATION

MSc Intelligent Transport Systems , Czech Technical University   *2013 - 2018*
